STRAIGHTFLASH VF

DUPONT

StraightFlash VF (versatile flange) is a dual-sided flashing tape providing a durable seal around brickmould and non-flanged windows. As one of the latest offerings from Dupont's Tyvek construction product portfolio, the product is self-sealing and performs through a wide range of temperatures, relieving builders' need to rely exclusively on caulk, the company reports. 800/448-9835 | www.construction.tyvek.com

SIMONTON

Sliding impact vinyl doors are now available from Simonton Windows' StormBreaker Plus product line, and are possibly the largest array of open-

ing sizes for vinyl-framed, impact-resistant sliding doors, the company reports. The doors come in two- and three-panel configurations and range in size from 5 feet by 6 feet, 8 inches to 12 feet by 8 feet. Nine stock sizes are available with tan or white vinyl frames. The doors are made with one pane of tempered glass and one pane of impact-resistant laminated glass. Various glass package options are available to meet Energy Star guidelines, including Solar E and greylite. Grid options include prairie, perimeter and colonial styles in white, tan or brass. Fiberglass hideaway screens and stainless steel hardware are standard. Available accessories include jamb extenders, drywall returns and a surround flange.

STORMBREAKER PLUS

IQ GLASS

Radiant heating is provided directly from a home's windows with IQ Glass. The technology prohibits condensation, drastically reduces dust buildup and can reflect sunlight, the manufacturer reports. It is safe to touch and can be controlled with a thermostat or remote control operation.

KWIKSET

A Venetian bronze finish is now available on Kwikset's collections of handlesets, doorknobs, levers and deadbolts, including Kwikset Security products, the entire Kwikset Ultramax Signature line and Kwikset's Maximum

VENETIAN BRONZE

Security line, including the Cameron knob, Tustin lever and Powerbolt 1000. The finish is a custom, hand-finish that creates unique and lustrous bronze highlights, similar to the handcrafted, Old World appearance

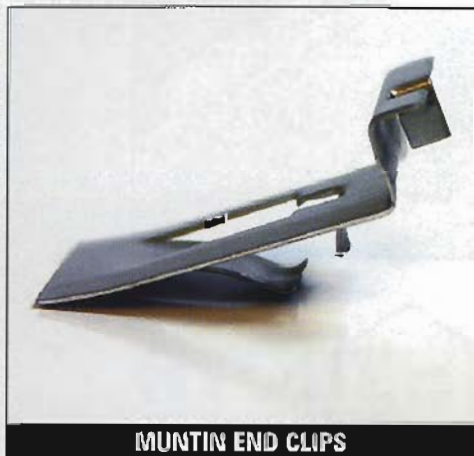

produced with an oil-rubbed bronze finish. Unlike traditional oil-rubbed finishes, this finish leaves no oily residue and it will not show wear as it ages, the manufacturer reports.

NUPRO

Indexable-tip and barb-tip end clips utilize a positive grip technology, keeping muntin bars firmly in place. The clips are manufactured by Nupro Products Inc. primarily for use with Edgetech's Super Spacer edge seal product line. The indexable tip end clips are available specifically for automated lines, enabling manufacturers to accurately place muntin bars with no measuring involved. The barb tip end clip provides ultimate hold, and is ideal for heavy grids and large window applications, the manufacturer reports.
